VDO Autodiagnos Check

December 2019 - Software version 01.12

VDO are pleased to announce the release of the latest software for your VDO Autodiagnos Check service tool.

The new software features extended vehicle coverage and improved functionality. Apart from the promised **OE data** model year update for [Opel](#), **brake service functions** for brand new [BMW](#) models as well as **diesel injector** configuration functions for [Mercedes](#) and [Ford](#) have been added.

There has been a substantial model year update for [Peugeot/Citroen \(PSA\)](#) and [Fiat Alfa Lancia](#) includes extended service functions.

Finally, the service process is even more simplified thanks to new [step-by-step instructions](#).

For a full list of the supported makes and models, please click the application list available on www.autodiagnos.com.

New instructions to reset 'Service Due' indicators

In some cases vehicle manufacturers do not support a diagnostic routine to reset 'Service indicators'. However, the Autodiagnos Check now includes a new feature to guide the user through a manual service reset procedure using step by step instructions and supporting images to enable the reset.

Note:

- More than 200 models now supported
- Please select 'Manual Service Reset' in the main menu
