VDO Autodiagnos Check

February 2021 - Software version 01.15

VDO are pleased to announce the release of the latest software for your VDO Autodiagnos Check service tool.

The new software features user interface improvements, extended vehicle coverage and improved functionality. Service functions for engine and EPB on [Opel/Vauxhall](#) vehicles have been extended. There has been a substantial model year update for [Peugeot/Citroen \(PSA\)](#) and [Renault](#). Also, new service functions have been added for Dacia and new models for VAG.

For a full list of the supported makes and models, please click the application list available at www.autodiagnos.com.
